

**WIRE CODE**

White wire----- Ground
Blue wire----- Electric brake
Black wire----- Battery
Red wire----- Stop lamp switch

1. Locate the vehicle's electric brake control harness connector. The harness will be located underneath the dash and left of the steering column. (A) taped to another harness near the emergency brake pedal. There will be a 4-pin connector that mates with the brake control connector.
2. Peel off tape and plug the vehicle connector in to the brake control connector.
3. Plug mating end of the brake control connector into the brake control.

Wire to brake control by function only. Color coding is not standard among all manufacturers. To ensure proper installation, read brake control instructions thoroughly.
